DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species VII in Paper No. 9 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 43 and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Atkinson (GB 1,593,152). Atkinson discloses a container for storing an item, comprising a body (cylindrical tube) defining an interior space for storing the item; an opening through which the item can be stored in the body and removed therefrom; a closure element (cap 3) having an open position permitting access to the interior space and a closed position closing the interior space; and a calculator located on the container. See the Figure embodiment and column 1, lines 18-26.
4. Claims 43- 44 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Chu (des. 410,672). Chu discloses a container (CD box) for storing an item, comprising a body (CD tray) defining an interior space for storing the item; an opening through which the item can be stored in the body and removed therefrom; a closure element (CD cover) having an open position permitting access to the interior space and

a closed position closing the interior space; and a calculator located on the container.

See Figure 1 embodiment.

5. Claims 43- 44 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Terkildsen (5,115,893). Terkildsen discloses a container (carrying case 10) for storing an item comprising a body (bottom panel 14) defining an interior space for storing the item; an opening through which the item can be stored in the body and removed therefrom; a closure element (top panel 12) having an open position permitting access to the interior space and a closed position closing the interior space; and a calculator (48) located on the container. See Figure 1-5 embodiments.

6. Claims 43-47 are rejected under 35 U.S.C. 102(a) as being anticipated by Sutton (6,179,025). Sutton '025 discloses a container for storing an item, comprising a body (12) defining an interior space for storing the item; an opening through which the item can be stored in the body and removed therefrom; a closure element (flap 19) having an open position permitting access to the interior space and a closed position closing the interior space; and a calculator located on the container. See Figure 3 embodiment and column 5, lines 61-64.

With respect to claims 45 and 47 and the item being a pair of eyeglasses, see column 5, lines 24-26.

With respect to claim 46, the first portion (body 12) and the second portion (closure flap 190) are hinged together.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 45 and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Terkildsen in view of Bowers (6,24,400). Terkildsen as described above discloses all the limitations of the claims except that it is silent about storing a pair of eyeglasses in the container. Bowers discloses a container (carrying case 1) within which a variety of different personal and business modules such as calculators (42) and eyeglasses (38) are to be stored and transported. (See Figure 3 and column 4, lines 31-32). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to also store a pair of eye glasses in the carrying case of Terkildsen as taught by Bowers.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are containers analogous to applicant's instant invention.
